

# Influenza Surveillance Report

Division of Epidemiology - Disease Surveillance and Investigation  
District of Columbia Department of Health

## 2017-2018 Influenza Season Week 45 (November 5, 2017 – November 11, 2017)

(All data are preliminary and may change as more reports are received)

### SUMMARY

- 3 new case of influenza were reported by hospitals during this reporting period
- 6 additional cases were reported for weeks 42 through 44
- Zero pediatric deaths were reported during this period
- For the 2017-2018 influenza Season to-date, 21 positive Influenza cases have been reported
- DC PHL did not report any specimens tested for week 45
- Flu activity remains low in the District

### INFLUENZA SURVEILLANCE FROM HOSPITALS & AMBULATORY CARE FACILITIES

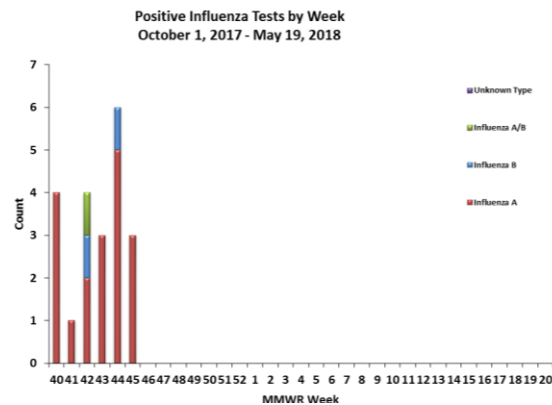

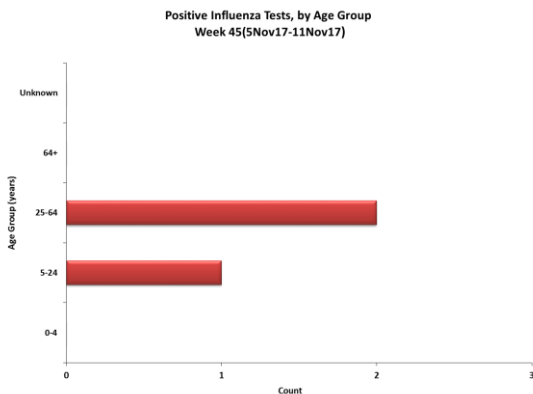

District of Columbia hospitals and laboratories report detailed information on cases of Influenza on a daily basis. However, in accordance with CDC guidelines, only Influenza-associated deaths in cases <18 years of age and Novel Influenza A infections are reportable. We also request that Influenza hospitalizations be reported if possible.

The table below summarizes weekly and cumulative cases of Influenza for the 2017-2018 Season. Data are also presented by age group and by number of cases reported weekly. During week 45 (November 5, 2017–November 11, 2017), there were 3 new cases of influenza reported. 6 additional cases were also reported for weeks 42 through 44. To date, the District has received 21 positive influenza cases reported by hospitals.

### Surveillance of Influenza Cases Reported By Influenza Type

	Week 45 (November 5, 2017–November 11, 2017)		Cumulative Cases for Weeks 40–20 (October 1, 2017–May 19, 2018)	
<b>Influenza A</b>	2	(66.67%)	17	(80.95%)
<b>Influenza B</b>	1	(33.33%)	3	(14.29%)
<b>Influenza A/B</b>	0	(0.00%)	1	(4.76%)
<b>Influenza (not typed)</b>	0	(0.00%)	0	(0.00%)
<b>Total</b>	3*	(100%)	21*	(100.00%)

\*Includes results from Rapid Diagnostic Testing, Viral Culture, RT-PCR, Serology, and Immunofluorescence.

**RAPID DIAGNOSTIC TESTING**

Rapid Diagnostic Tests are screening tests used to detect the Influenza virus in a short period of time. While initially less accurate than PCR and viral culture, rapid diagnostics are more accurate as the Influenza season progresses. During week 45, 144 out of a total of 325 tests were performed using rapid diagnostic testing in clinical laboratories. Of these, 3 (2.08%) positive Influenza specimens were identified using rapid diagnostics.

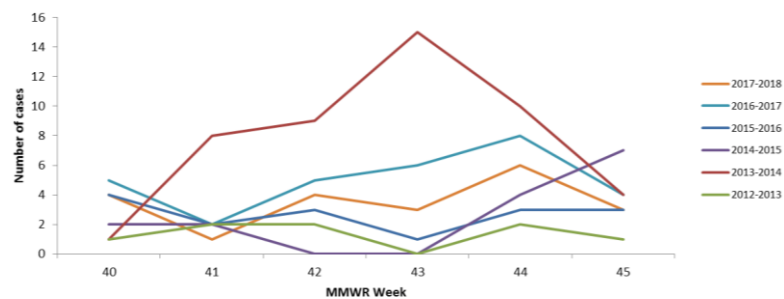

Week: 45 (Nov 5, 2017 – Nov 11, 2017)	
No. of specimens tested Rapid Diagnostics	144
No. of positive specimens (%)	3 (2.08%)
<b>Positive specimens by type/subtype</b>	
Influenza A	2 (66.67%)
Influenza B	1 (33.33%)
Influenza A/B	0 (0%)
Influenza – unknown type	0 (0%)

**WEEK 45 COMPARISON WITH PREVIOUS SEASONS**

For week 45, there were 3 new cases in the current 2017-2018 season, 4 cases in last year’s 2016-2017 season, 3 cases in the 2015-2016 season, 7 cases in the 2014-2015 season, 4 in the 2013-2014 season, and 1 in the 2012-2013 season.

Cumulatively, there are a total of 21 cases in the district up to week 45 for the current season, 30 during the 2016-2017 season, 16 during the 2015-2016 season, 15 in the 2014-2015 season, 47 in the 2013-2014 season, and 8 in the 2012-2013 season.

Number of Cases as of Week 44 for 2012-2013, 2013-2014, 2014-2015, 2015-2016, 2016-2017, 2017-2018

**INFLUENZA-LIKE ILLNESS (ILI) SURVEILLANCE**

Sentinel surveillance for ILI consists of three outpatient reporting sites for the District of Columbia. The sentinel surveillance sites report the total number of ILI cases encountered per week and the total number of patients seen at the clinic during that same week. For this system, ILI is defined as the existence of fever (temperature of 100°F [37.8°C] or greater) and a cough and/or a sore throat in the absence of a known cause other than Influenza.

For week 45, sentinel providers reported 304 out of 13,581 visits (2.24%) that met the criteria for ILI.

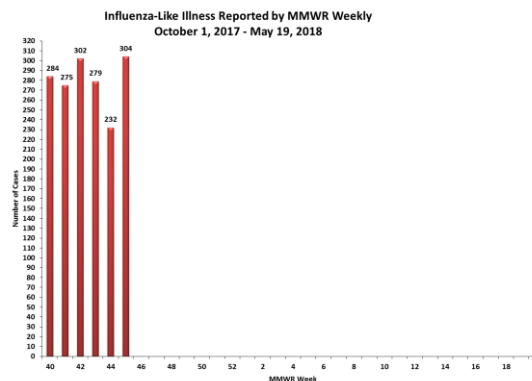

**Geographic Spread of Influenza for Washington, DC**

Week of	Activity *
Nov 5 – Nov 11	No activity

**\*No Activity** – overall clinical activity remains low and there are no lab confirmed Influenza cases;

**Sporadic** – isolated lab confirmed Influenza cases reported and ILI activity is not increased;

**Local** – increased ILI activity and recent lab confirmed Influenza cases. As the District of Columbia is not a state, this is the highest level of ILI activity it can report.

## INFLUENZA TESTING BY THE DISTRICT OF COLUMBIA PUBLIC HEALTH LABORATORY (DC PHL)

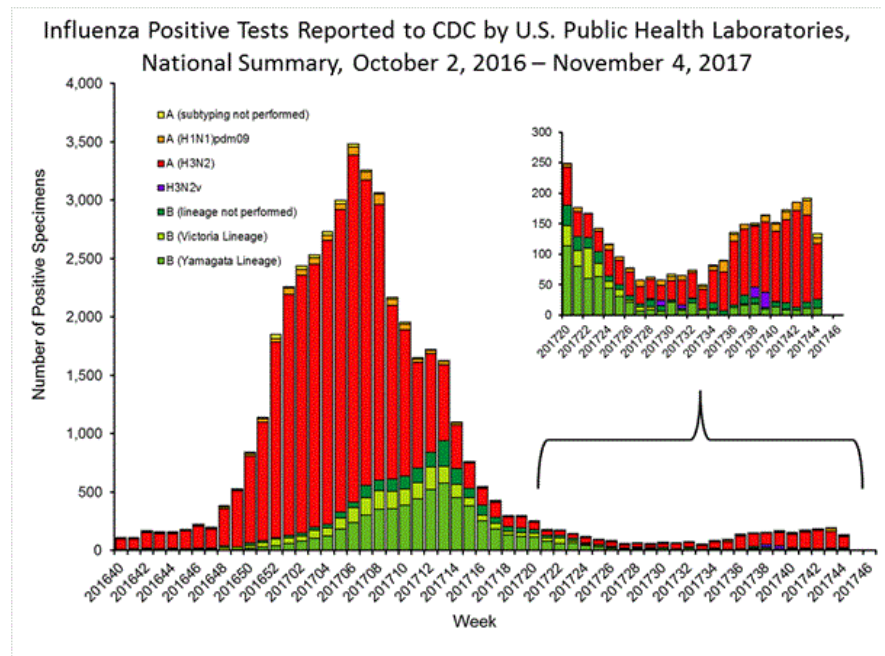

The DC PHL subtypes human isolates to monitor the circulating strains of Influenza. The isolates are submitted to the DC PHL by hospitals and commercial laboratories. DC PHL did not report any specimens tested for week 45.

### DC PHL Surveillance of Influenza Cases Reported By Influenza Subtype

DC PHL Influenza Testing	Nov 5, 2017 – Nov 11, 2017	Total Cases October 1, 2017 – May 19, 2018
<b>Number of specimens tested</b>	0	0
◆ <b>Number of specimens positive for Influenza:</b>	0 (0%)	0 (0%)
● <b>Influenza A</b>	0 (0%)	0 (0%)
▪ <b>H1 2009 H1N1</b>	0 (0%)	0 (0%)
▪ <b>H1 seasonal</b>	0 (0%)	0 (0%)
▪ <b>H3</b>	0 (0%)	0 (0%)
● <b>Influenza B</b>	0 (0%)	0 (0%)

## NATIONAL INFLUENZA ASSESSMENT

The CDC's weekly seasonal Influenza surveillance report for week 45 noted that influenza activity was increasing in the United States. The proportion of deaths attributed to pneumonia and influenza (P&I) was below the system-specific epidemic threshold. No pediatric deaths were reported to the CDC during week 45 for the current season. For the 2017-2018 season, one pediatric death associated with Influenza has been reported in the US for this season. During week 45, 714 specimens were tested by public health laboratories, of which 173 were positive. Of the 173 respiratory specimens that tested positive during week 45, 154 (89.0%) were Influenza A and 19 (11.0%) were Influenza B. Of the Influenza A samples, 12 (7.8%) were 2009 H1N1, 135 (87.7%) were H3, and 7 (4.5%) were un-typed.

**Get Vaccinated!**

To find an Influenza vaccine provider, visit the District of Columbia Immunization Resource Center at <http://doh.dc.gov/node/190532>

For additional information about Influenza and Influenza activity in the United States, please visit: <http://www.cdc.gov/flu/index.htm>. Questions about Influenza in the District of Columbia or this report should be directed to the Division of Epidemiology - Disease Surveillance and Investigation at (202) 442-9150 or email [keith.li@dc.gov](mailto:keith.li@dc.gov).
